CH.SIRI CHANDANA	https://github.com/SiriChandu9/checklist
P.VYSHNAVI	https://github.com/pinnamanenivyshnavi/to-do-web-app

DESCRIPTION :-

Our check list allows to view, create and delete to-do's (which is nothing but, the things we need to do) which are in list format that we generally use to maintain our day to day task.

It also has a feature of small sticky notes and we can also view previously stored notes, where we can have an idea of the things which are done, which are yet to be done.

IDE used - Visual Studio Code

Languages used - HTML, CSS , JavaScript

Documentation - Confluence

PROJECT STAGES :-

Designed the html schema.

Created styles in CSS.

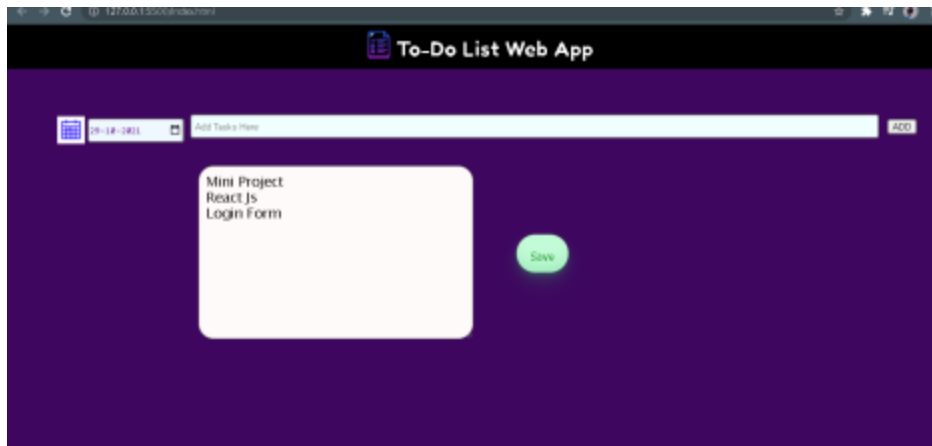

Major role played here is java script for creating lists and to perform actions.

Used local storage to store remainders .

REQUIREMENTS :-

Install Visual Studio code in your local system as we will be using HTML, CSS and JS.
Web Browser.
